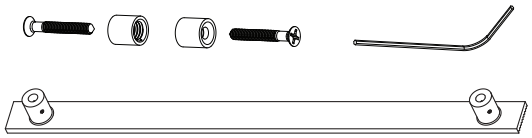
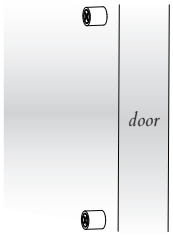
INSTALLATION INSTRUCTIONS FOR ONE HANDLE PER DOOR

1 Unpack the Pull



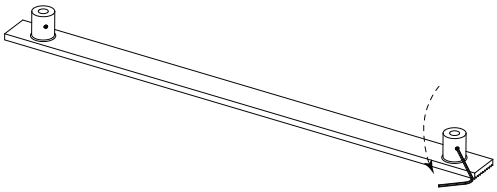
For this particular type of installation you need to utilize all the parts that are shown: 1x pull, 2x brass housings, 2x wood screws and Allen Wrench.

2 Screw wood screws



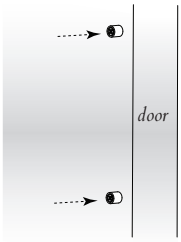
Screw the wood screw through the brass housing directly into the door, in the right position previously measured correctly.

3 Loosen the Screws



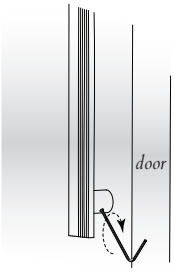
Use the Allen wrench to loosen the screws on the legs to prepare for the mounting on brass housings.

4 Mounting handle on the door



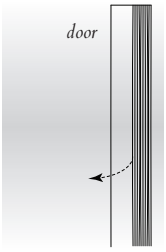
Slide the brass housings into the holes of each leg, on one handle, adjusting as needed for the correct depth.

5 Secure the handle



Tighten the screws to secure the joiner pieces and legs firmly.

6 Test the Handle



Test the door handles to ensure they are securely attached.
